WHAT IS MENTAL HEALTH SUPPORT AND RECOVERY?

Mental health support provides opportunities for people with a lived or living mental illness to commence and fulfill their own individual journey of recovery.

The most widely used definition of personal recovery is from Anthony (1993):

... a deeply personal, unique process of changing one's attitudes, values, feelings, goals, skills, and/or roles. It is a way of living a satisfying, hopeful, and contributing life even within the limitations caused by illness. Recovery involves the development of new meaning and purpose in one's life as one grows beyond the catastrophic effects of mental illness.

RECOVERY INCLUDES;

- Focus on wellness and health,
- Improving quality of life,
- Working together with service support to achieve personal goals, and;
- Building on strengths and developing self-esteem.
- Purposeful valued activity

Our consumers are our focus! We are committed to providing an environment and services where people are empowered; and ensure that consumer's rights are respected and upheld at every opportunity. As service users, consumers should be aware that they also have responsibilities to the organisation.
